

EFFECTIVE LIGHTING WORKSHOP

12th December

Appropriate lighting for cameras is essential for high quality, usable images to be recorded over the full 24 hour period.

Many Day/Night camera systems "hunt" between colour and black and white operation at dusk, finding it difficult to settle on either mode until it gets fully dark. To combat this, Vista have released a unique integrated package that forces the camera into black and white mode and automatically turns the associated white or IR lighting on.

Following the release of this integrated package, Vista is proud to present a series of free workshops to advise installers the benefits of integrated lighting and how to achieve the best results.

As well as looking at the advantages of such a system, the courses will also focus on how to best set up the cameras, allowing installers to learn how to set up their own systems and get the most out of their footage.

Courses will be held on the **12th December at SEE Norbain.**

SEE Norbain
Seecom Technology Centre
Wyrefields, Poulton-le-Fylde
Lancashire
FY6 8JX

Each session will last around one hour, and begin at **10am, 12 noon, 2pm and 4pm**. Food and drinks will be provided.

To register please complete the attached form and fax back to : **01253 893 333**. If you require any further information please email andy.lomax@norbain.co.uk.
