# PHILIPS

SUPERIOR PICTURE  
QUALITY, REGARDLESS OF  
THE LIGHT  
CONDITIONS.

Philips Cameras are designed to meet the specific needs of your security application. They easily integrate with our entire security product line including monitors, multiplexers, and control equipment. Full integration offers you a complete, easy-to-install, low-maintenance CCTV system from a single vendor.

Our customer service program supports your system's operation and features off-the-shelf shipment, along with a three-year guarantee. More options, better quality, more support — only from Philips.

### LTC 0600 Series

With the LTC 0600 Series, you can expect high performance in any light.

- Vividly defines color in the lowest light — where the human eye cannot distinguish.
- Picture quality remains consistently clear with automatic monitoring and adjustment of contouring, black level, and light controls.
- Lens detection wizard simplifies lens installation.
- Software available for remote programming.

### LTC 0450 Series

- High-resolution, sensitivity, and reliability provide optimal performance in all environments.
- Automatic white balance delivers truer color in image reproduction.
- Backlight compensation improves scene reproduction, especially in brightly lit locations such as doorways, windows, loading docks, and ATMs.
- Electronic shutter automatically adjusts to changing light levels, enhancing image quality.

### LTC 0430 Series

The LTC 0430 Series are compact, rugged digital color cameras for cost-effective surveillance.

- High sensitivity in a standard resolution camera balances picture quality and economy.
- Automatic white balance and backlight compensation for excellent scene reproduction.
- Electronic shutter enhances image quality.

# MONOCHROME CAMERAS

## LTC 0500 Series

The automatic functions of the LTC 0500 Series enhance picture quality.

- Retains scene contrast in the lowest light – where the human eye cannot distinguish.
- Lens detection wizard simplifies lens installation.
- Automatic contouring enhances sharpness.
- Automatic black level improves picture contrast.
- Software available for remote programming.

## LTC 0350 Series

- High-resolution for optimal performance.
- Backlight compensation improves scene reproduction, especially in brightly lit locations such as doorways, windows, loading docks, and ATMs.
- High sensitivity increases visibility in low light conditions.
- Electronic shutter automatically adjusts to changing light levels, enhancing picture quality.

LTC 0600 &  
LTC 0500 SERIES

LTC 0430 &  
LTC 0450 SERIES

LTC 0330 &  
LTC 0350 SERIES

## LTC 0330 Series

- High sensitivity and reliability in a standard resolution camera balances picture quality and economy.
- Backlight compensation for excellent scene reproduction.
- Electronic shutter enhances image quality.
