

AutoDome Camera Systems

Security Systems

The hands-free
approach to
motion tracking.

AutoDome with AutoTrack... Catch all the action with the full line of AutoDome products, now available with revolutionary AutoTrack technology. These dependable systems offer discreet security for any application, indoor or outdoor, day or night.

Security you can rely on.

BOSCH

AutoTrack

Beyond motion detection.

Bosch AutoDome cameras with AutoTrack not only detect motion and activate an alarm, but also zoom in on the motion and track it. An AutoDome with AutoTrack will monitor an area with a pre-set tour, but once motion is detected the camera automatically locks onto the subject, zooms in for a better view and follows the subject

anywhere within the camera's 360° coverage area. Security personnel can concentrate on the required response. Starting recording when motion is detected provides an uninterrupted record of where movement has taken place.

AutoDome with AutoTrack is the perfect solution for a wide variety of applications including:

Retail stores and banks

During business hours, the AutoDome can monitor general traffic. After hours, it can be set to watch an entrance or be on a pre-programmed tour. Apart from detecting and tracking intruders, it helps provide a video record of maintenance and security personnel activities. AutoDome with AutoTrack is the hands-free solution for retail security.

Warehouses

Track the movement of people and vehicles during normal operation for a record of inventory movement. After hours, the AutoDome can perform a tour and if motion is detected, interrupt the tour, track the subject and alert a central control station. AutoTrack lets you see everything that happens in your warehouse.

Outdoor perimeter surveillance

Use AutoDome cameras to monitor the perimeters of prisons, schools and industrial sites. AutoTrack will detect motion, follow it and alert a central control station. Areas of normal activity can be deactivated using privacy masking and/or sector blanking. The advanced motion detector allows you to configure your parameters to your customized needs. Protect even the outer edges of your property with AutoDome.

Introducing AutoDome with AutoTrack

The hands-free approach to motion tracking.
Once again, Bosch raises video surveillance technology to a new level with the introduction of AutoTrack, the innovative motion tracking capability built into our AutoDome cameras.

The next generation of motion detection, AutoTrack not only senses movement but follows it, leaving guards' hands free to tackle other responsibilities. No more missing the action. No more focusing on an intruder only to have him walk out of the frame. AutoTrack detects motion, zooms in on the target and tracks it.

AutoDome with AutoTrack is the ultimate security solution for any application that requires motion detection, whether it's a prison, school, airport, commercial or retail environment.

AutoDome

Part of a totally integrated system.

All AutoDome camera systems, the new AutoTrack model included, easily integrate with the entire line of Bosch surveillance products, including Divar digital versatile recorders and Allegiant matrix switchers.

AutoDome, combined with our complete line of products, lets you create a low-maintenance CCTV system for any application from one reliable manufacturer.

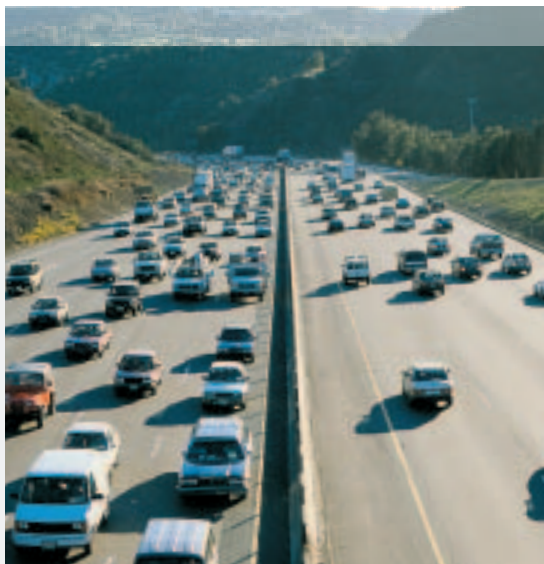

EnviroDome

Outdoor Systems

Bosch EnviroDome cameras are the ideal solution for perimeter surveillance, parking lots and other outdoor applications. Day/night cameras automatically switch from color to monochrome when light levels decrease to give extra sensitivity, while high-resolution cameras with optical zoom up to 25x get the finest detail. For extreme conditions there is even a pressurized version available. Whatever the weather may bring, from rain to snow to sunshine, EnviroDome maintains peak performance.

AutoDome

Indoor Systems

Inside, nothing beats the AutoDome. Its small size makes it inconspicuous. Automatic functions eliminate guesswork and make for easy operation. And it offers all the features you need to monitor everything from schools to offices, shopping malls to casinos. Camera options include a day/night version with 18x or 25x zoom that lets you focus on details other cameras are missing. And the new AutoTrack feature allows hands-free motion tracking, so you see it all. The wide variety of mounting options lets you place cameras in the most effective locations throughout your building.

BasicDome

Economical Systems

The BasicDome camera is the affordable surveillance solution for indoor security applications. It offers faster, quieter and smoother operation than ever before in a dome in this price range. The BasicDome is the perfect choice for those who want the assurance of the Bosch name at an affordable price.

Completing the installation

Bosch has the most complete line of options and accessories in the industry.

The AutoDome line offers all the accessories you need to complete the installation, including all types of indoor and outdoor mounts, special bubbles to match and complement the surroundings, power supplies, and fiber optic versions. For high-risk areas we also offer the exclusive rugged bubble to protect your AutoDome camera against vandalism.
