- Heating system with thermostat (on @ 10°C, off @ 25°C)
- 240V AC and 12/24V options
- Constructed from epoxy coated (marine finish) aluminium able to resist extreme weather conditions and temperatures from -25°C to +200°C
- Slide and hang service feature

FULL AND SEMI CABLE MANAGED EXTERNAL CAMERAS

Conforming to an impressive IP66 rating, each unit in the VCMH range is pre-treated with an extremely durable marine weatherproof epoxy coating. As a result you can rest assured that the housing and its valuable contents will remain protected - even in the most hostile of environmental conditions. The same protective coating will also prevent UV radiation damage to your surveillance equipment.

However, despite its extremely tough exterior the VCMH range has been thoughtfully designed to maximise ease of installation and subsequent maintenance. The top of the housing, when unsecured, slides forward and then hangs below the housing body giving you maximum accessibility to the camera inside without having to remove the sunshield. The unit also features an integral bracket, allowing totally discreet cable management to be achieved.

All units come with an integral heater and thermostat to monitor changes in weather conditions, as well as a separate aluminium sun shield to ensure that the housing is kept cool when external temperatures rise.

THE UK'S PREMIER CCTV BRAND
