

Browser Client v1.1

REMOTE VIEWER

Browser Client v1.1 is the remote viewer for the Intellex® Digital Video Management System product line, enabling IT administrators to host live video from one or more Intellex units on a dedicated web server. Subsequently, end users type in a URL of the video web server, and once they log in, they can view live video from any of the Intellex units that the IT administrator has included in the list. The IT administrator controls how many end users can log in.

The Browser Client set up software runs on Windows® operating system with Microsoft's Internet Information Server services. End users can access Browser Client on any computer that runs Internet Explorer and Windows operating system.

FEATURES

- NEW Remote dome control through Intellex
 - Remote viewing of live Intellex video through web browser
 - Access to multiple Intellex units
 - Similar GUI to Network Client™
 - Free Web Administration software package
- Easy 1-2-3 step installation and setup for the administrator
- Ability to custom tailor background for the viewer
- Self installing plug in software upon connection
- Password protected
- Online help to use Browser Client

SPECIFICATIONS

Operational

Remote AccessVia LAN, WAN, Internet, or Dial-up

Maximum number of concurrent connections to an Intellex unit

Intellex DV16000Five

Intellex DV8000Two

LanguagesEnglish

Browser Client v1.1 Software includes

- Necessary files that the IT administrator needs to host Intellex units
- The user's manual
- Plug-ins for the Browser Client that are automatically installed to the end user's computer

Minimum Client and Server Computer Requirements

Client, running Browser Client:

- Pentium 400MHz or higher
- 128 MB RAM
- Windows 98, Windows 98 SE, Windows 2000, Windows XP
- Internet Explorer 4.0 or higher
- Direct Draw 7 or higher

Server, hosting video for Browser Client:

- Pentium 400MHz or higher
- 64 MB RAM
- Windows 98 SE running Personal Web Server (PWS) or
- Windows 2000 Professional or Server, Windows NT, Windows XP Professional with Internet Information Server (IIS)
- Network Card, 10BaseT or 100BaseTX

Minimum Network Requirements

TCP/IP network for IT administrator server that hosts video. TCP/IP or dial-up capability for the computers that access the web to view video via Browser Client. Each Intellex unit that is being added to the list will require an IP address.

Minimum Intellex Requirement

DV16000 and DV8000 running Intellex version 2.2 or greater.

Order Information

Contact your Intellex sales representative and have them email your IT administrator the Browser Client installation software free of charge.
