

SVT-RM10

Remote Control Unit

The Sony SVT-RM10 Remote Control Unit can be used with all Sony SVT Time Lapse VTRs and offers a wide range of functions.

Features

Basic keys: STOP, PLAY, PAUSE, FF, REW, REV PLAY*¹ and RECORD

Additional keys: REC/PLAY SPEED (up, down), MENU and SHIFT (right, down)

Additional LED indicator features for VTRs 240mm (9¹/₂ inches) in width*²

(SVT-DL224/124/124P/LC300 VTRs)

An additional LED indicator (the red light to the left of the REC button) on the SVT-RM10 Remote Control Unit is available for Sony SVT-DL224/124/124P/LC300 VTRs.

Note: While the SVT-RM10 Remote Control Unit can be used with all SVT Series VTRs, the LED indicator does not function with the following VTRs 420mm (16⁵/₈ inches) in width: SVT-L200/L400/S3100/5050/3050/150 and SVT-5050P/S3050P/1000P/100P.

This LED indicator gives the user important information that is usually only displayed in the VTR LED display window. The LED indicator on the SVT-RM10 shows the following:

1. Recording

It indicates to the user that the VTR is recording.

2. Recording Pause

During a pause in recording, the indicator slowly flashes on and off, at one second intervals.

3. Recording Problem Warning

If problems occur during recording, the indicator quickly flashes on and off, at 0.25 second intervals.

4. Tape End Warning

The user knows that the tape has ended when the indicator flashes in a continuous sequence of one long flash followed by two short flashes.

*1 Special Playback functions for certain models:

Reverse Playback and Reverse Field Playback (SVT-S3100/5050/3050/L200/L400/5050P/1000P)

Reverse Playback only (SVT-150/S3050P)

Note: Reverse Playback works only in 2H mode (NTSC) and 3H mode (PAL)

*2 VTRs 240mm in width do not have Reverse Playback function

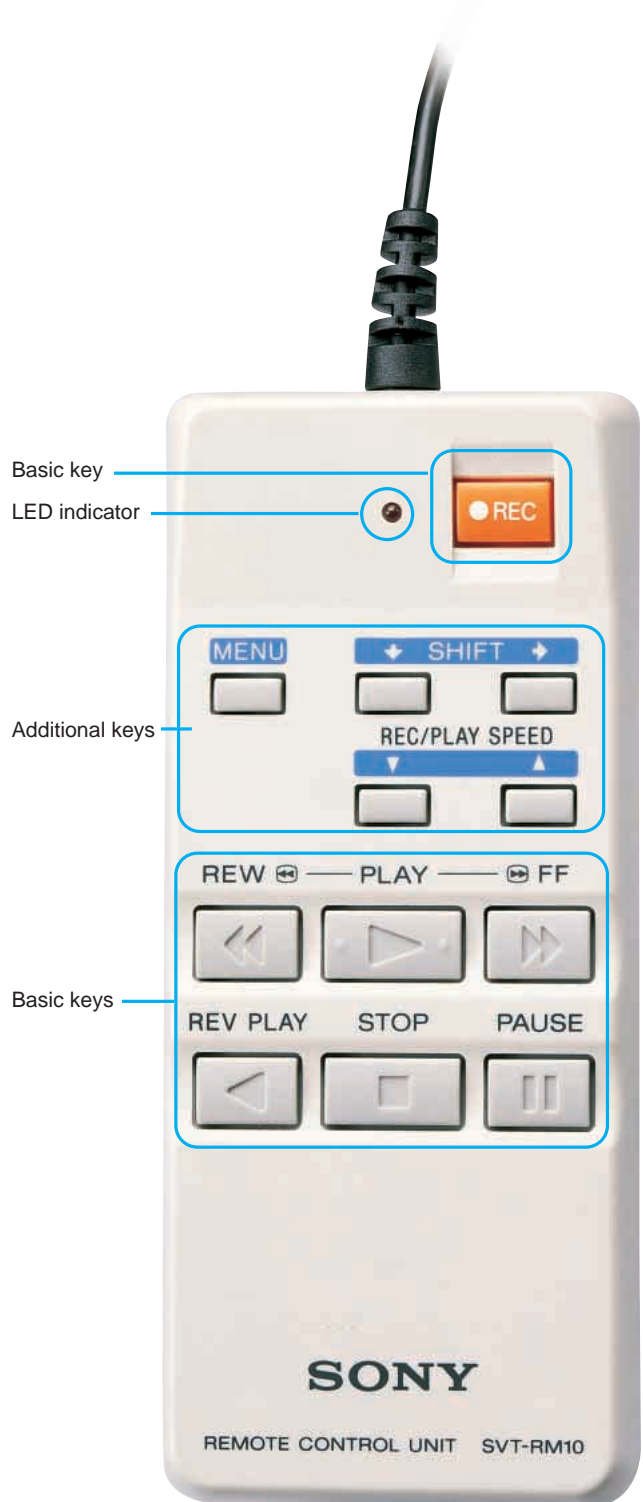

Specifications

Mass: 120 g (4 oz)

Dimensions: 56 (W) × 130 (L) mm
(2¹/₄ × 5¹/₄ inches)
