

Granta for Windows 4877 CCTV Manager Software

Granta for Windows CCTV Manager Software provides integration with the Visilynx CCTV control system from Molyx Videmech. As well as providing a “software keyboard” allowing direct control of the CCTV system from the PC screen, Granta monitors events on the access control system and sends commands via RS232 directly to the CCTV control system. In this way access control events can directly affect CCTV control without operator intervention and more importantly can be installed easily using a simple serial interface and user friendly configuration screens

CCTV also finds a natural home in the Alarm Graphics program where icons represent predefined cameras or views. Clicking on one of the icons displays the desired view and a software keyboard allowing control of the selected camera.

With Granta CCTV Manager you can:

- Integrate CCTV and access control functionality
- Control and configure CCTV functionality directly from your PC
- Bring a user friendly Windows interface to the CCTV system
- Provide “spot monitors” on PC workstations

Features

- Software keyboard
- Serial link to CCTV system
- Alarm Graphics interface
- Selective alarm triggers
- Spot monitor on screen

Benefits

- Single Access Control/CCTV interface
- Simple installation & commissioning
- Intuitive and easy to use Windows software
- Accurate management of visitor activities

For complete information on features and operation refer to the Software handbook HB02/100-9
